EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Lerch on July 30, 2004.

A) The abstract: --This invention concerns a thermocouple which is protected by an outer sheath comprising inner and outer tubes with the annular space filled with low temperature sintering refractory material which is preferably beaded before filling in the space and in which the outer tube is constricted to compact the material. The refractory material will include borosilicate and boric acid powder--.

B) The claims:

Art Unit: 2859

Claims 1-32 have been canceled by applicant.

33. (previously presented): A thermocouple comprising a sensing tip in electrical connection with a mineral insulated thermocouple cable characterized in that additional external shielding is provided by a low temperature sintering refractory material including particulate borosilicate and boric acid power, in which the tip is formed from a thermocouple cable with a negative metal tube housing a positive wire embedded in the low temperature sintering material.

Claims 34-40 (canceled)

41. (previously presented): A thermocouple comprising a sensing tip in electrical connection with a mineral insulated thermocouple cable characterized in that additional external shielding is provided by a low temperature sintering refractory material including particulate borosilicate and boric acid power, the shielding is in the form of a sheath having inner and outer metal tubes constricted over a filler of low temperature sintering refractory material, in which the tip is formed by providing a hot junction from the wires of the thermocouple cable and supported by the sheath with both tubes and the refractory material formed to cap the hot junction.

Claim 42. (canceled)

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.

Any inquiry concerning this communication should be directed to the Examiner Verbitsky who can be reached at (571) 272-2253 Monday through Friday 8:00 to 4:00 ET.
